EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 5, line 2, "signalinput" has been corrected to --signal input--.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: York (US '321, see fig. 4) does not show nor suggest providing "an ith bias line on the output terminal side provided between an output terminal portion of the Nth variable capacitance element and a connection point between a $(2i-1)$ th variable capacitance element and the 2ith variable capacitance element, where N and I are integers satisfying $N=2n+1$, $n \geq 1$, $1 \leq i \leq n$." as recited in claim 1, lines 12-17. Claims 8, lines 15-20, claim 30, lines 24-4 (p. 91) and claim 31, lines 19-24 also recite the same limitation as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
